# OVERVIEW

Without being in regular contact with communities to hear about their perspectives, we are not able to build a trusted relationship and implement effective programmes. Community feedback mechanisms help us hear from communities and act on what we are hearing in a systematic and efficient way. Over the past years, the International Federation of Red Cross and Red Crescent Societies and its member National Societies have gained considerable experience in

collecting community feedback. New methods were introduced, approaches refined and templates revised. This includes approaches to documenting feedback received during informal conversations, structured, proactive feedback collection through perception surveys, as well as feedback received through reactive feedback channels such as call centers. This toolkit aims to assemble all available resources and directs the user to those most relevant to a specific situation.

This kit is based on the 6 stages of the feedback cycle:

**Figure:** Stages of a feedback mechanism

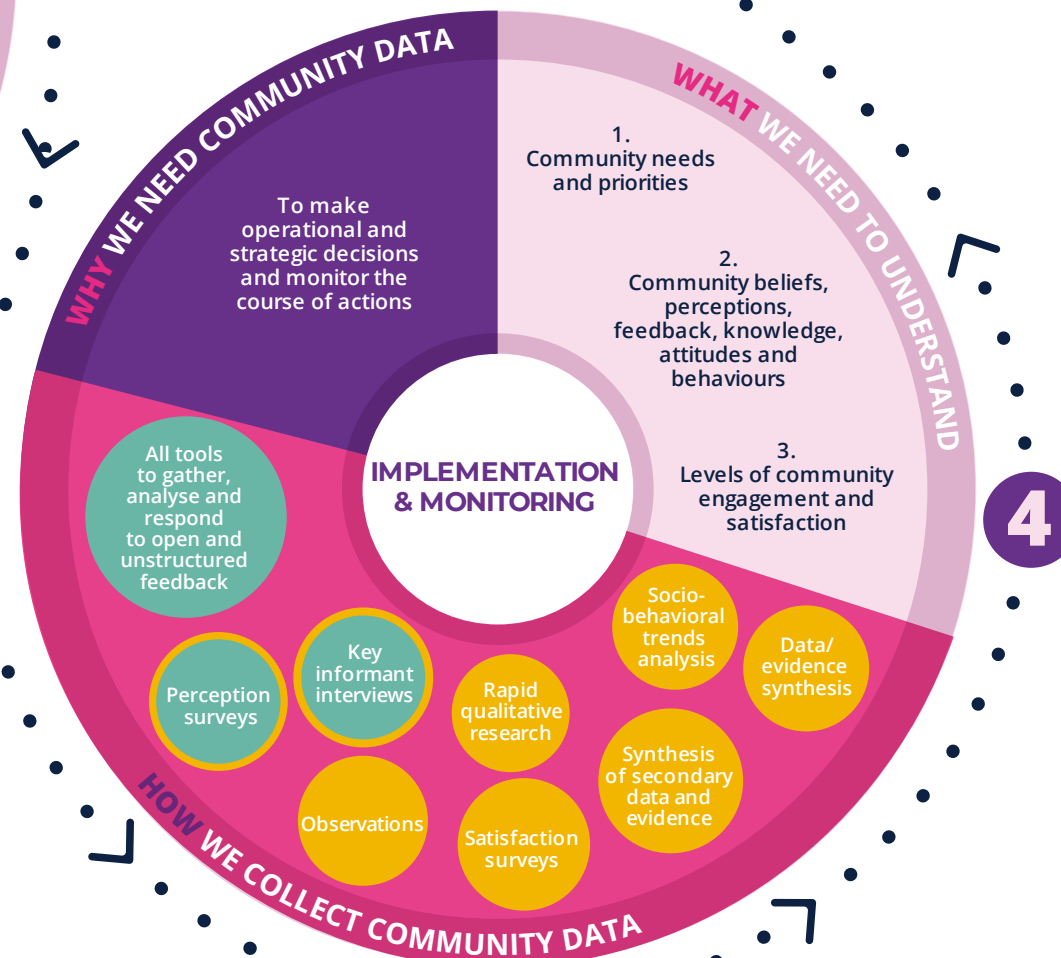

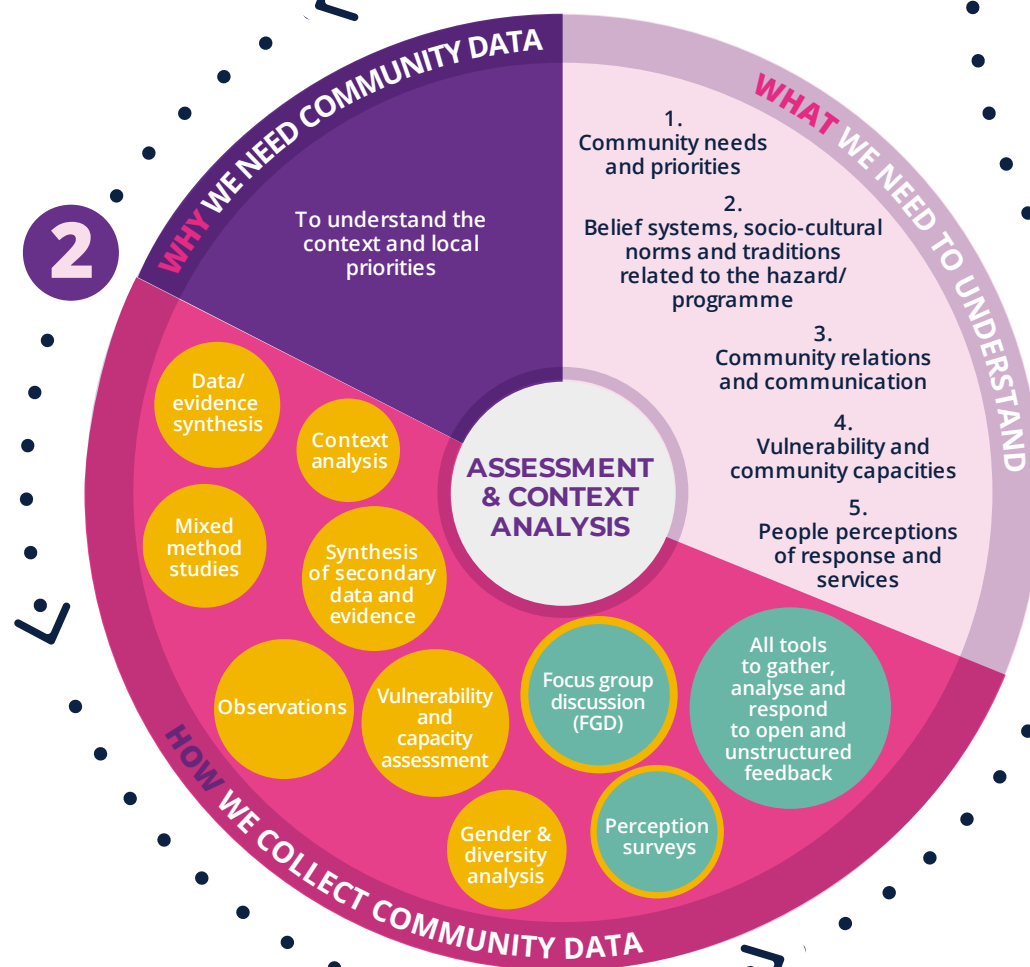

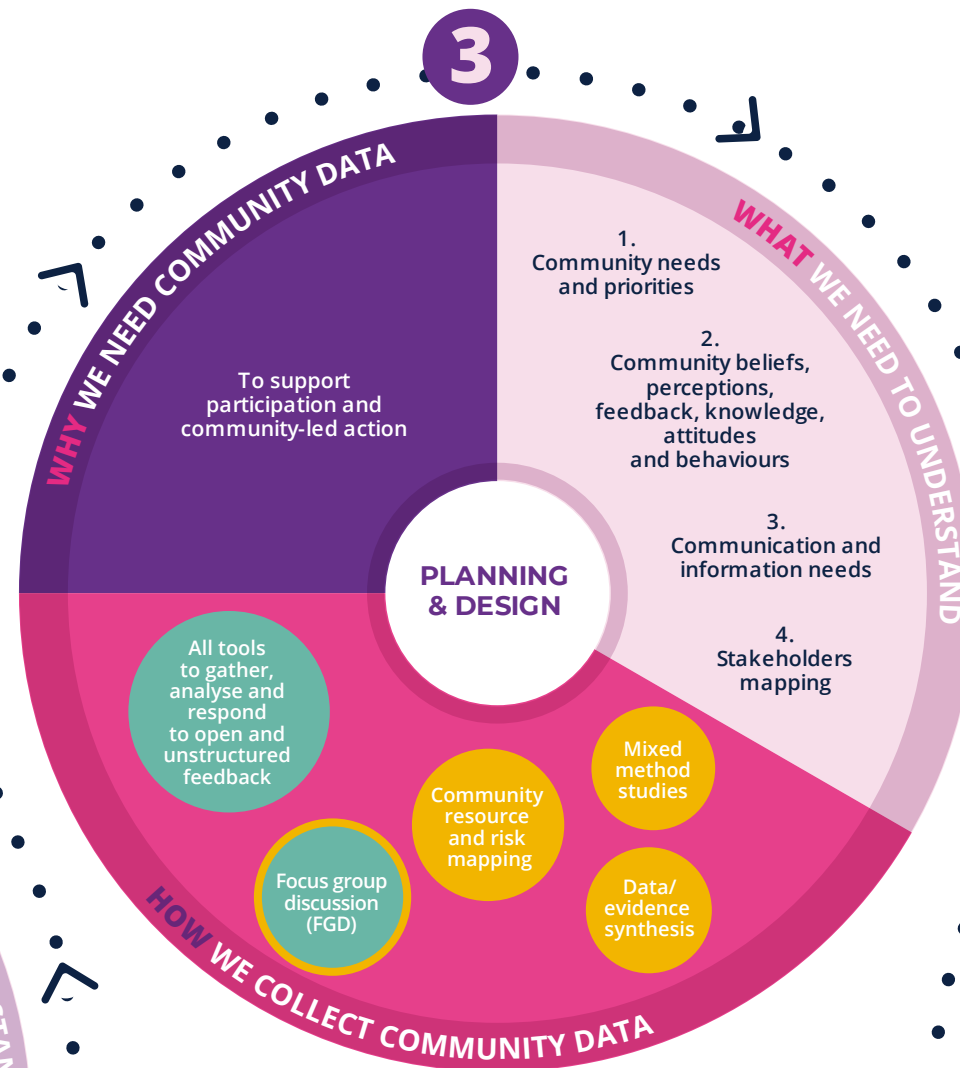

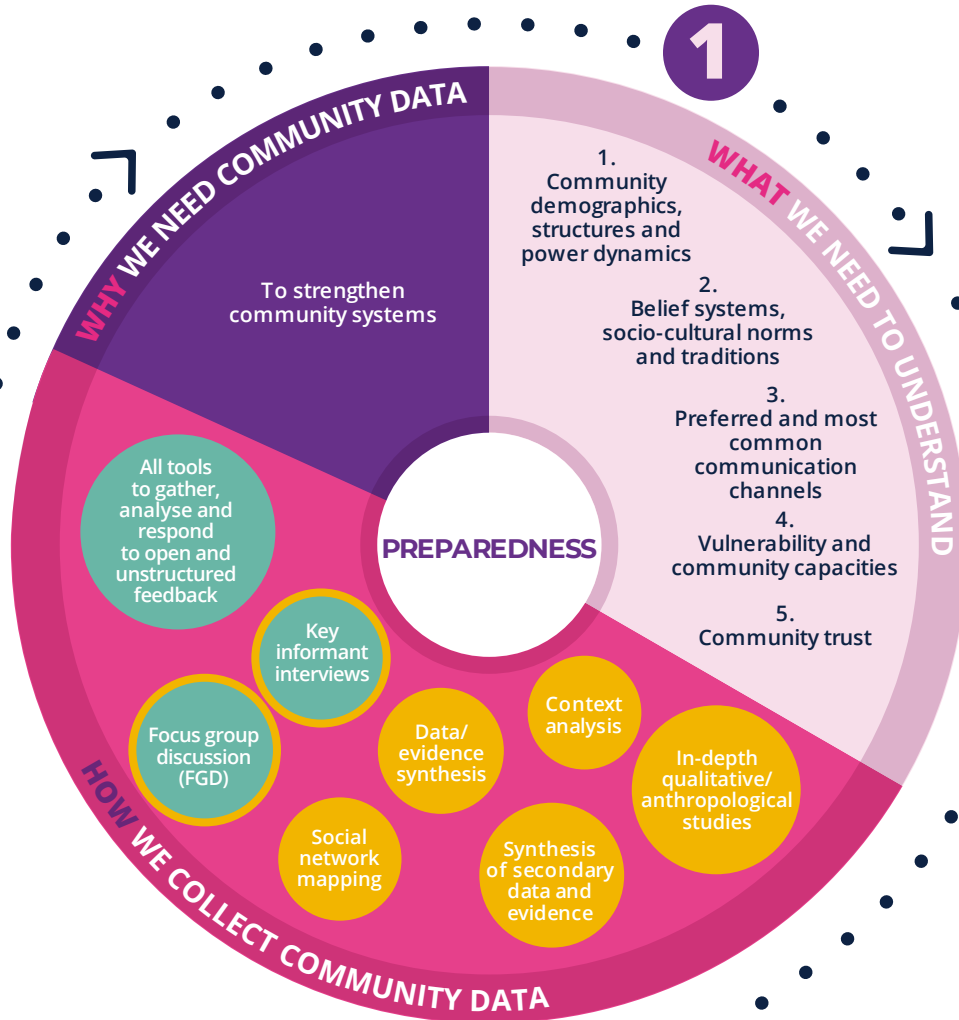

The five modules of the kit help you with all stages of the feedback cycle, but focus on different areas:

<p><b>1. Community Feedback - Why Bother?</b></p> <p>access here </p>	<p>This short module explains what community feedback is, how it helps us do a better job, and what a systematic and effective feedback mechanism looks like.</p>
<p><b>2. Feedback Essentials</b></p> <p>access here </p>	<p>This module provides the most important tips for setting up and running a simple feedback mechanism. It is organised around the steps of any feedback cycle and provides tools that help you plan the mechanism and collect, answer, analyse and share community feedback data.</p>
<p><b>3. How to Listen and Respond to Open Community Feedback</b></p> <p>access here </p>	<p>This module describes how to systematically document, analyse and use any kind of open, unstructured feedback shared by community members. It follows the same general structure as the feedback essentials and connects readers with tools they can use to put the guidance into action.</p>
<p><b>4. How to Use Perception Surveys in a Feedback Mechanism</b></p> <p>access here </p>	<p>This module provides guidance and tips for conducting perception surveys as part of a feedback mechanism. It follows the same general structure as the feedback essentials module and connects readers with tools they can use to put the guidance into practice.</p>
<p><b>5. How to handle sensitive feedback</b></p> <p>access here </p>	<p>This module provides guidance for handling sensitive feedback data in a way that ensures the information will be kept safe and will be shared with those who have the necessary training and dedicated responsibility to act on the information.</p>

# COMMUNITY DATA CYCLE

This graphic illustrates the WHY we need community data, for WHAT purposes, and HOW to choose the best tool or method centered around the stages of the humanitarian programme cycle. All tools are explained in more detail in one or more available toolkits.

Covered in the Feedback Kit

Covered in Feedback Kit and Toolbox  
and Social Science Toolbox

Covered in the Social Science Toolbox

Bangladesh 2022 - Community volunteers of Bangladesh Red Crescent helping to keep Bhashan Char island clean and liveable. They provide critical support to people who have relocated to the island from Cox's Bazar camps, after being displaced from Myanmar a few years back.
